Country	United States
Agency	General Services Administration
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	2

Project Description

Our agency is continuously struggling to keep up with workload demands. Our team has great ideas, but not enough time or skills to implement them properly. This is where you can help the GSA do things nobody else is doing in Government. Our region/division is already on the forefront of Government Tableau usage, a key leader within GSA as well as the Government. We are seeking outside agency perspectives on taking our data to the next level. These Data Viz presentations are often times presented to Executive Leadership as well as External Industry and Customers. In addition, we are seeking a transformation of our internal processes from Event Approvals, Website Design, Purchase Tracking, etc. We utilize Google, Salesforce, Office, Tableau, ESRI, and many others. We are looking for someone already skilled in Data Viz (Tableau or Micro Strategy), Google Scripts, Google Sites, and someone passionate about research, able to learn on the fly, work independently as well as part of a group, and above all have an open mind and be positive. If this is you, we would love to have you!

Desired Skills Interests

Additional Information

We can provide travel if we feel it is necessary. There is a background check requirement for initial access to systems.

Language Requirements

None
